

Page 1: Data from Interview

This page contains visuals of data gotten directly from interviewing individuals, before transporting the data for analysis. Questions include *yes/no* questions (answers shown in Pie charts), how many times they do a certain thing, and what mode of transport they use. This page also includes sliders to filter by obesity categories and age, in case you want to view data from a specific category or age.

"Do you eat high caloric food frequently?"

"Do you monitor the calories you eat daily?"

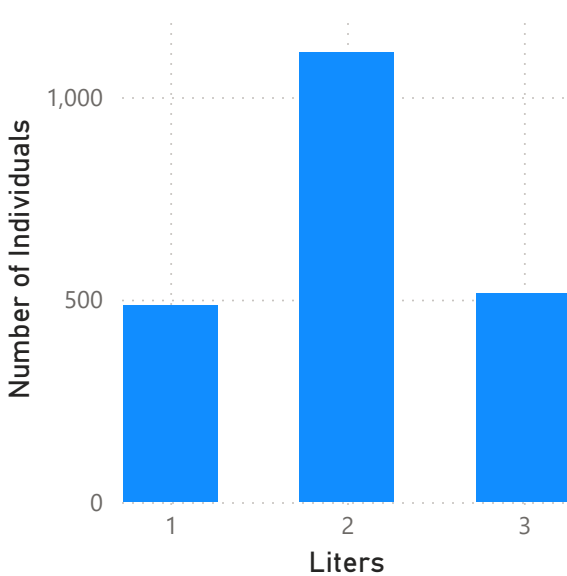

"Do you smoke?"

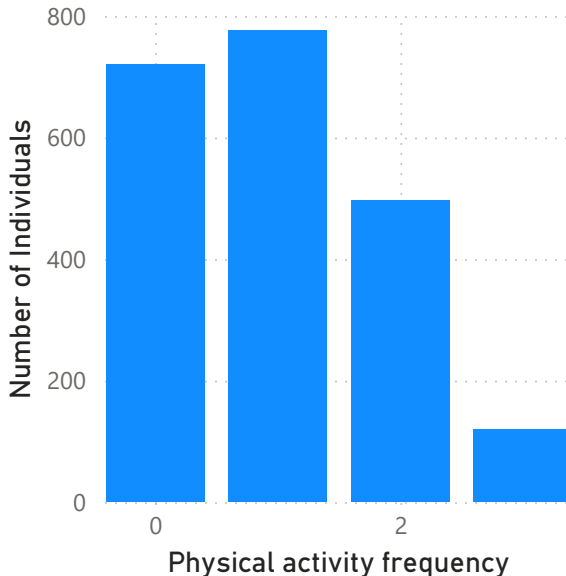

"Has a family member suffered or suffers from overweight?"

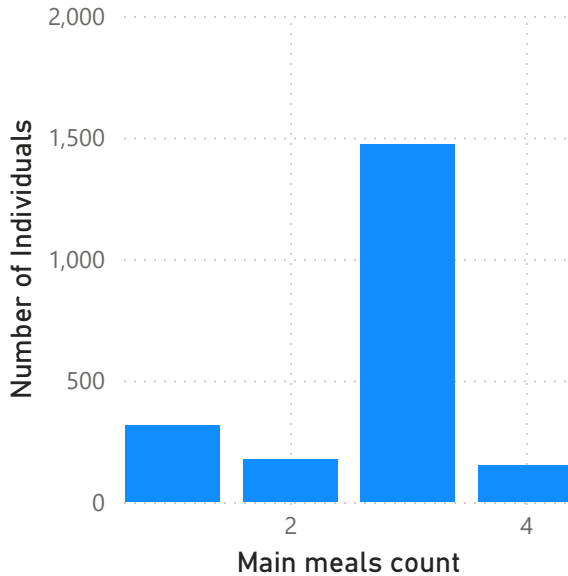

"How much liters of water do you drink daily?"

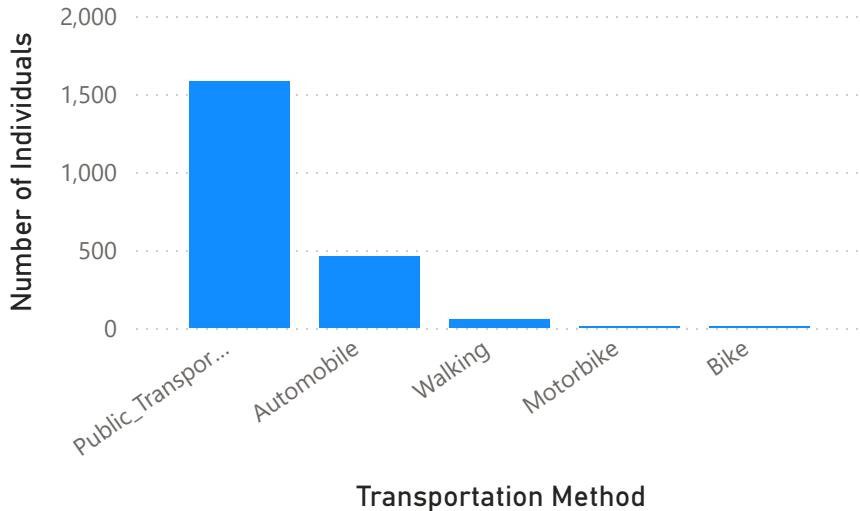

How often do you have physical activity?

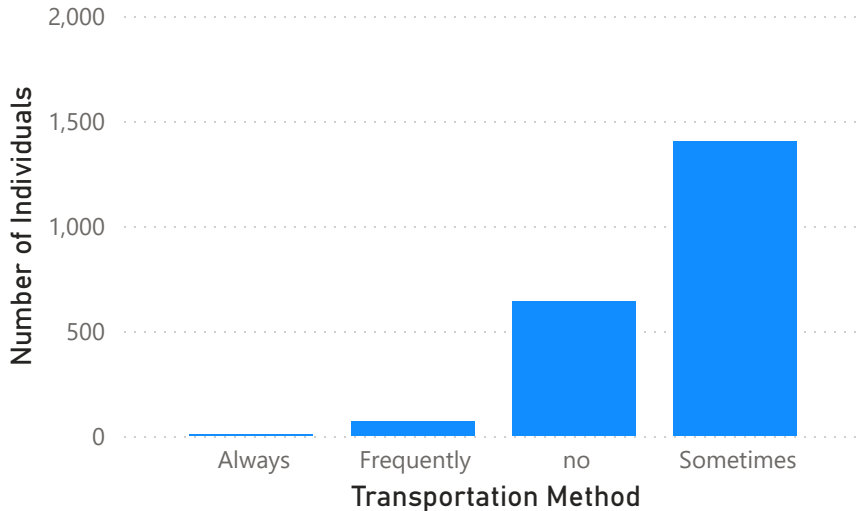

"How many main meals do you have daily?"

"Which transportation do you usually use?"

"How often do you drink alcohol?"

Page 2: Data from Analysis

This page contains visuals of information from analysis on the data we got from the interviews. They show more organized and needed insights, including obesity distribution (based on category) and details about them. We'll also be using BMI (Body Mass Index) instead of weight (which is calculated by *weight/height²*)

Obesity Category	Count of Records	Average BMI	Average Age	Average Height	Average Weight	Average daily water intake
Insufficient_Weight	272	17.40	19.76	1.69	49.91	1.86
Normal_Weight	287	22.01	21.74	1.68	62.16	1.85
Overweight_Level_I	290	25.99	23.43	1.69	74.27	2.06
Overweight_Level_II	290	28.22	26.97	1.70	82.09	2.03
Obesity_Type_I	351	32.26	25.90	1.69	92.87	2.12
Obesity_Type_II	297	36.72	28.26	1.77	115.31	1.85
Obesity_Type_III	324	42.27	23.50	1.69	120.94	2.27
Total & Average	2111	29.70	24.32	1.70	86.59	2.01

Exercise vs BMI pattern

Average of BMI by Age

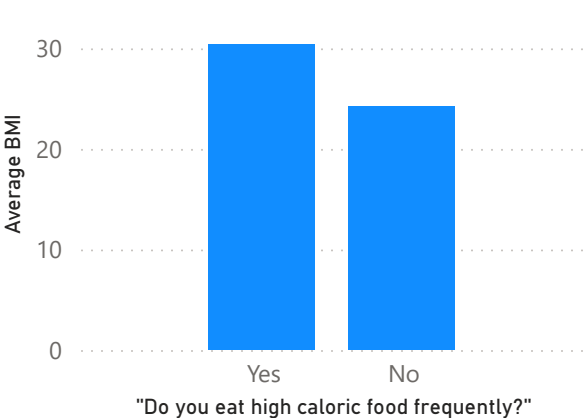

Obesity distribution

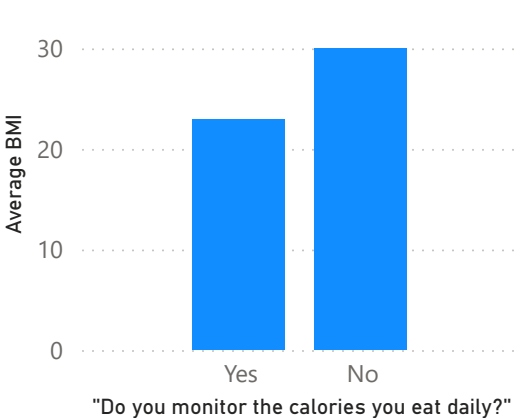

Average BMI by Transportation Mode

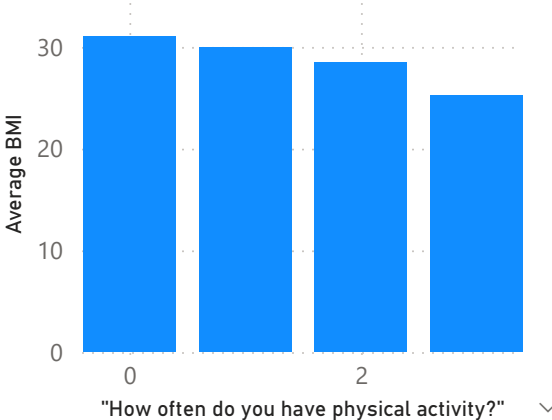

Average BMI by those who eat high caloric food frequently

Average BMI by those who monitor their calories

Average BMI by those who perform physical activity (sports)
